Multi-Tenant SaaS Requirement

Each company must have separate data.

Database tables must include:

- company_id

Example:

- bookings.company_id
- vehicles.company_id
- drivers.company_id
- customers.company_id

Users should only access data belonging to their company.

Technology Stack

Backend:

- Laravel 12 API

Frontend Admin:

- React.js

Database:

- MySQL

Mobile App:

- Flutter

Payment:

- Razorpay

Hosting:

- AWS / DigitalOcean
-

Phase 1 (MVP)

Duration: 30 Days

Deliverables:
